

Aspire Hybrid Comfort Mattress

The HYBRID COMFORT is an Acute mattress system offering foam-in-cell technology enabling flexible operation as a high comfort foam static support surface or a powered-up alternating pressure support surface. Specifically re-engineered for increased patient comfort, foam layering now effectively supports patient weight ranging from 50 - 230kg.

- **Immersive Visco-elastic Memory Foam Surface:** Top layer is now twice as thick to offer significant improvement in user comfort
- **Intelligent Hose Management:** When not in use the air-hose can be stored internally, reducing infection control and OH&S risks
- **Integrated Shear Reduction:** Memory foam layer moves independently of the cell surface reducing shear when bed is adjusted
- **Optimised Heel Protection:** Tapered heel zone redistributes pressure to lower leg, away from the vulnerable heel region. The castellated surface collapses in a wave-like movement reducing shear
- **Innovative pump technology:** Reduces noise and vibration for undisturbed sleep
